**DETAILED ACTION**

This Office Action is in response to the amendment filed February 12, 2003 for the above identified patent application.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hudson (US Patent 4,982,705).

Hudson illustrates in Figure 2 a gear (68) having a teeth formed around an outer periphery, a hub, a web, radially extending rib portions (82), and blades (84), wherein the blades are located on an extension of a corresponding diametrical rib.

Referring to column 4, lines 31+, Hudson discloses the gear can be integrally made from molded plastic.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Reference 04-102754 in view of Hudson (US Patent 4,982,705).

The prior art Japanese Reference 04-102754 teaches a pair of meshing gears, wherein one of the gears is formed with a fan. The Japanese Reference does not illustrate the claimed fan, such as an end of each of the blades on the surface side being located on an extension of a surface of a corresponding diametrical rib and/or the fan being molded. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the gear arrangement disclosed by Japanese Reference 04-102754 with the fan arrangement of Hudson, motivation being to provide a relatively inexpensive fan having a which is capable of a predetermined load and cooling capacity.

### ***Response to Arguments***

5. Applicant's arguments with respect to claim 1-6 have been considered but are moot in view of the new ground(s) of rejection.
